

NOVA.

The Future of
Outdoor Living.

Doha, Qatar | Est. 2026.

Intelligent Transformation

In the evolving landscape of Qatar, outdoor spaces demand more than just design—they require intelligent transformation.

Nova specializes in bespoke outdoor hardscape, smart pergolas, elite BBQ corners, and our signature engineering marvel: Automated Pool Covers.

The Masterpiece Collection

Five Revolutionary Systems.
Zero Compromises.

Reclaim your space, control your climate, and elevate your architecture. Swipe to explore the definitive portfolio of automated aquatic concealment.

System 01: Sliding Pool Covers

Mechanism: Motorized lateral rail track system. Glides seamlessly over the water to create a rigid, fully walkable terrace.

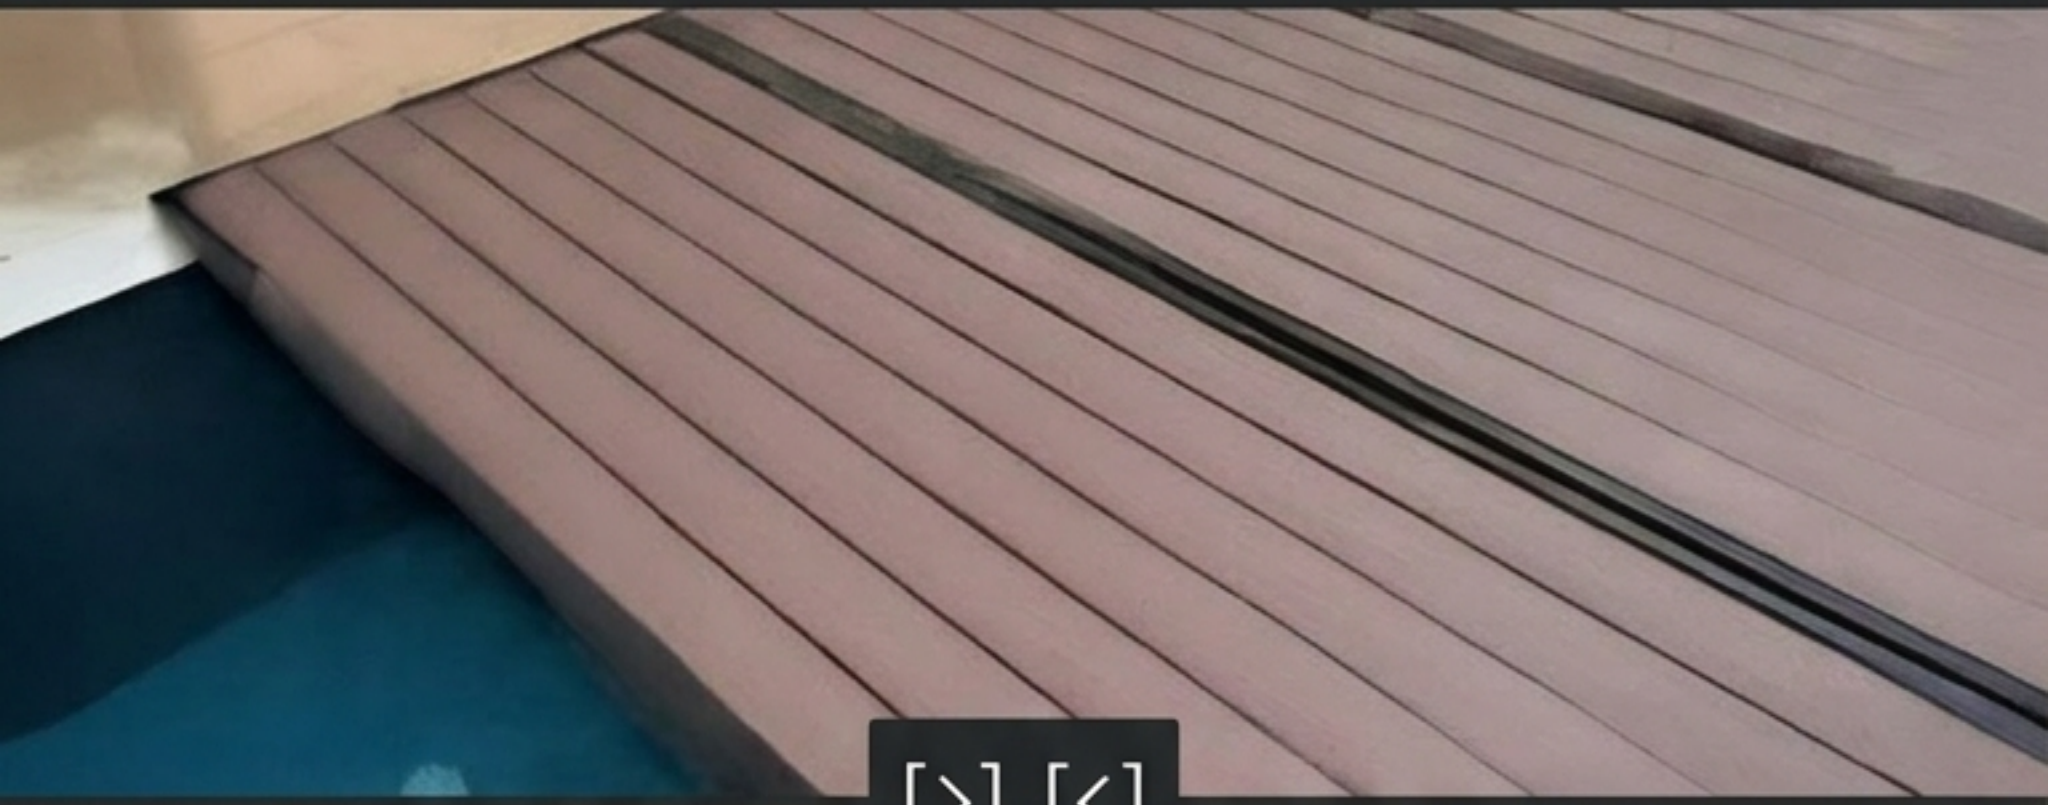

Materials: Aerospace-grade aluminum sub-frame finished with premium composite or natural teak decking.

System 02: Roll Pool Covers

Mechanism: High-torque tubular motor reel. Deploys floating slats smoothly across the water's surface at the push of a button.

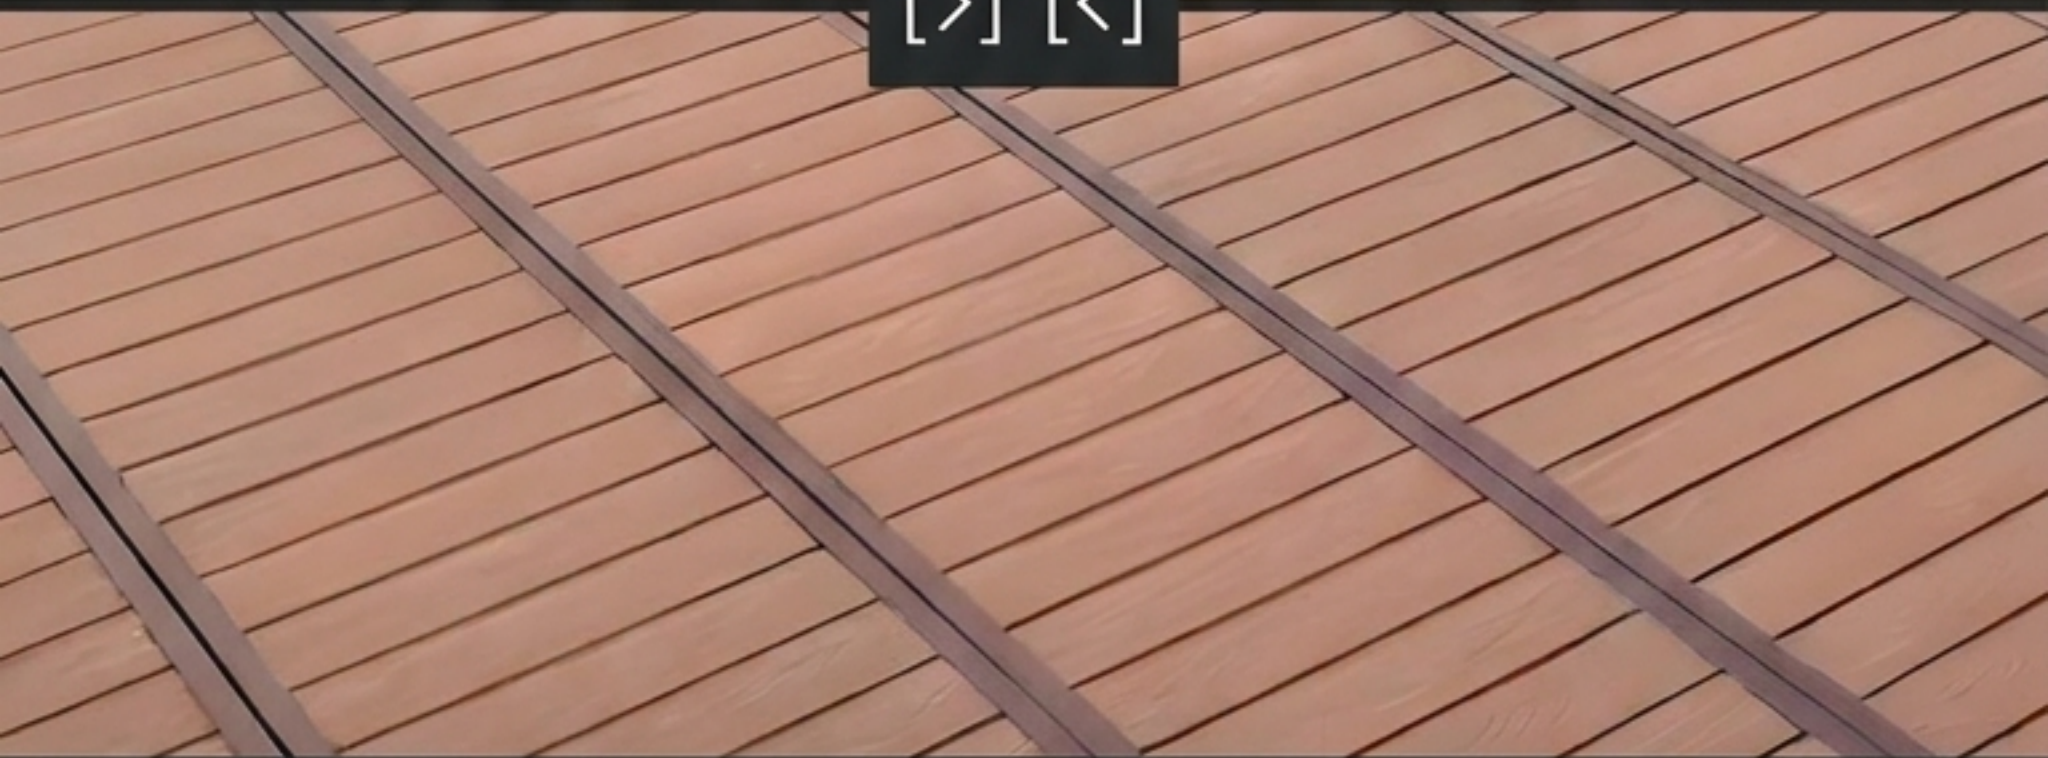

Materials: UV-resistant PVC or advanced polycarbonate slats; marine-grade stainless steel automated reel housing.

System 03: Solid Slices Covers

Mechanism: Interlocking, telescopic folding sections. The panels nest together tightly and expand linearly to lock into a rigid, walkable cover.

Materials: Insulated structural core panels wrapped in high-fidelity, slip-resistant wood-grain composite.

System 04: Hydraulic Elevated Floor

Mechanism: Submerged hydraulic scissor-lift network. Rises from the pool floor to the surface, instantly converting the pool into a fully weight-bearing entertainment space.

Materials: Heavy-duty 316L marine stainless steel framework, driven by bio-oil hydraulic cylinders.

System 05: Hydraulic Elevated Shade

Mechanism: Motorized vertical corner pillars. Acts as a sun-blocking pergola canopy by day, and descends vertically to securely seal the pool by night.

Materials: Powder-coated architectural aluminum framing with custom tinted polycarbonate or structural glass canopy panels.

The Nova Synthesis Matrix

	 Walkable Surface	 Provides Shade	 Integration Footprint
Sliding	✓	—	Lateral Extension
Roll	—	—	Surface Only
Solid Slices	✓	—	Lateral Extension
Hydraulic Floor	✦	—	Invisible/ Submerged
Hydraulic Shade	—	✦	Vertical Canopy

Select your system based on spatial dynamics and lifestyle demands.
